

Overview	<p>The script will check turn on Tamper on all machine where it has been disabled across all sub estates</p> <p>IT WILL NOT OVERRIDE TAMPER BEING TURNED OFF VIA GLOBAL SETTINGS</p>
Install Python	Follow the Python install guide provided for your OS
Check you have requests installed	
<p>Open Py.exe on Windows</p> <p>Use the Terminal on a Mac</p>	 <p>The screenshot shows a Windows Start Menu search for 'py'. The 'Best match' section shows 'py' with the subtext 'Run command'. Below this, there are sections for 'Search the web', 'Apps (4+)', and 'Folders (1+)'. On the right side, there is a larger card for 'py' with the subtext 'Run command' and three options: 'Open', 'Run as administrator', and 'Open file location'.</p>
	 <p>The screenshot shows a Windows terminal window titled 'C:\Windows\py.exe'. The terminal output displays the Python version and build information: 'Python 3.8.1 (tags/v3.8.1:1b293b6, Dec 18 2019, 22:39:24) [MSC v.1916 32 bit (Intel)] on win32'. It also shows the prompt 'Type "help", "copyright", "credits" or "license" for more information.' followed by the prompt '>>>'.</p>

Type - help('modules')

This will list all the modules installed

Note csv and datetime are installed already

We will need to install some Modules

PC

Type - python -m pip install requests

Note there is a module called request. We need requests

Mac

```
C:\Windows\py.exe
>>> help('modules')

Please wait a moment while I gather a list of all available modules...
